

ARCHITECTURAL DESIGN & CABINET

616 S. RIVER ROAD #220, ST. GEORGE, UT 84790
Ph.435-673-4767, Fax 435-635-3316

Ideal Client

Our favored client(s) have a plan or are working with “preliminary plans” from a “Home Plan Service” or other allied professional, and are having trouble visualizing the 3-D space in 2-D drawings. There is generally a special area of interest, like a kitchen, that they are unsure about and want help with. They want to explore design ideas. They are looking for expert help to validate their ideas, and propose solutions to layout challenges and design details. They want someone who can “see” what the space may look like and visually help them and others see it as well.

Core Difference

Architectural Design helps people “see” and “design” the most valued rooms in a home.
Architectural Cabinetry provides finely detailed and installed kitchens and baths.
Architectural Light provides beautiful, *Advanced Energy Star* lighting plans and fixtures.

Architectural Design provides a 3-D computer walk-through of a home before it is built, helping you, or your client, to “see” what the “blueprints” could not. We can work with your design ideas and provide design and layout solutions and expertise to create the most valued rooms in a home. We specialize in room layout, and kitchen and bath design.

Architectural Cabinetry finely details the layout, cabinetry and architectural details that go into crafting fine kitchens and baths. We provide kitchen and bath plans, cabinetry, and cabinet installation, countertops and all other component parts needed to complete a room and ensure a job well done. We train with and consult with national experts in the industry for the latest in style, design and best industry practices. We are associated with the National Woodwork Institute, the American Institute of Architects, the National Kitchen and Bath Association, Wood-Mode and Medallion industry experts and cabinet makers as well as local build cabinet makers. We are experienced, licensed and insured finish carpenters. We only employ experienced licensed and insured installers. Our clients enjoy a multi-layer of experience, insurance, and peace of mind that a job will be complete as specified and valued. Although we help our clients “see” their project before installation, it is rare that the final product does not exceed expectations.

Architectural Light is an *Energy Star Partner* with the US Dept. of Energy, specializing in providing Advanced Lighting Design and fixtures to meet Energy Star and LEED specifications that can save on energy costs and environmental impact.

Our Architectural Services can provide design expertise, product knowledge and build know how, to create and build the most valued rooms in a home. *Architectural Design* is not here to draw plans or fill space with cabinetry. Not many can do what we do. We build a comprehensive picture of a project you can “see”, build value into a home with specific details and design elements and can “see” the project through to completion.
