### **Our Products**

Our products focus on the design and implementation of *Inspiring Kitchens and Baths*.

The first step in creating value, romance, and inspiration for the room(s) you wish to build or remodel is to choose a **3-D Design Portfolio** that meets your needs. These portfolios include a ballpark cost estimate. The next step is to specify products that will provide specific details and value for your residence. We can explore a number of options and specify and bid products we offer and/ or we can send it out for bids from other vendors. Our goal is to provide products that will: (1) meet or exceed design goals, (2) meet or exceed fit and finish details, (3) be sustainable over time, and (4) meet or exceed our client's expectations. Architectural Design stands behind our work and products. Work or products provided by others cannot be guaranteed by Architectural Design. We cannot be held responsible for design details not carried out by other vendors or the quality of products not purchased through Architectural Design. Client initial (\_\_\_\_)
